

Graphene/Graphite Atmospheric Electricity Collectors – Plus Horrific Hexacopter Crash!

by lasersaber | Jun 2, 2014 | Atmospheric Electricity

While on family vacation I was able to swing by and check out this atmospheric energy test site. They have some amazing energy harvesting technology and encourage replication. Since the visit I have had a non-stop stream of new ideas running through my head, but...

Mini AtmoMotor

by lasersaber | Mar 10, 2014 | Atmospheric Electricity, Motors

This is the most sensitive AtmoMotor design yet. The motor has been designed with easy construction in mind. It makes an excellent wireless demonstration motor.

AtmoMotor HV Atmospheric Motor

by lasersaber | Dec 24, 2013 | Atmospheric Electricity, Motors

A high torque atmospheric motor. Tests underway...

Atmospheric Electricity Antenna Testing

by lasersaber | Dec 4, 2013 | Atmospheric Electricity

Testing to determine the best type of antenna for my experiments.

Free Atmospheric Electricity Powers Small Motor – Tesla Radiant Energy

by lasersaber | Nov 26, 2013 | Atmospheric Electricity, Featured Projects

I have always wanted to test a radiant energy motor. This little motor is the beginning of my research in that direction. In the near future I will be making larger more powerful motors. The precision required will probably require my 3D printer.
